11 Mellissa M. Prunty, Anna L. Barnett, Kate Wilmut, Mandy S. Plumb, Handwriting speed in children with Developmental Coordination Disorder: Are they really slower?, Research in Developmental Disabilities, 2013, 34, 9, 2927 Methods Within the case study approach of the evaluation, questionnaires, including open-end questions, were sent to 70 families. All had attended the screening clinic 6 years earlier and had little subsequent contact with the occupational therapy service. Semi-structured interviews were held with 12 mothers who volunteered to participate. These enabled specific issues raised in the questionnaires to be explored in greater depth. Interviews were audiotaped and full text transcripts produced for analysis. 13 Rainer Blank, Bouwien Smits-Engelsman, Helene Polatajko, Peter Wilson, European Academy for Childhood Disability (EACD):

Recommendations on the definition, diagnosis and intervention of developmental coordination disorder (long version)*, Developmental Medicine & Child Neurology, 2012, 54, 1, download 9 Marie-Laure Kaiser, Children with Developmental Coordination Disorder: The Effects of Combined Intervention on Motor Coordination, Occupational Performance, and Quality of Life, Journal of Occupational Therapy, Schools, & Early Intervention, 2013, 6, 1, 44 Abstract The year 2002 saw an avalanche of discoveries about the roles of RNA in influencing gene activity, lending some credence to the radical idea that small RNAs hover ‘above’ the genome, providing a matrix of regulatory control. Scientists found that. 15 W. Peersman, W. Carton, D. Cambier, J. De Maeseneer, H. van Waelvelde, Psychometric properties of a motor skill checklist for 3- to 5-year-old children, Child: Care, Health and Development, 2012, 38, 3, 350 Wiley Online Library Abstract The Central Propaganda Department of the Chinese Communist Party (CCP) has a central, guiding role over the whole of Chinese society in the current era. The Central Propaganda Department oversees the Propaganda and Education System (xuanjiao xitong). 18 Jillian G. Pearsall-Jones, Ian P. Piek, Lyndall Steed, Megan R. McDouggall, Florence Levy, Monozygotic Twins Concordant and Discordant for DCD: Two Sides to the Story, Twin Research and Human Genetics, 2011, 14, 01, 79 Results Over half the questionnaires were returned despite the length of time elapsed since hospital contact. Parents who responded reported a download of problems in their children. Difficulties spanned motor and academic performance, emotional/behavioural responses and social interaction. Twenty-eight children (80%) of respondents were reported as having difficulties in three or more areas. Bullying was a commonly identified problem. At interview mothers spoke at length about their experiences and reported feeling stressed and distressed. Mothers reported a lack of support and expressed feelings of isolation. They said that their time investment in their child with DCD had pronounced effects on themselves and other family members. Specifically they highlighted time spent fighting the system, primarily for educational support. It is a great honor and privilege to deliver the 2010 Radiological Society of North America Presidential Address. Due to the explosive growth in technology and the emergence of systems biology, radiology is once again presented with an extraordinary array of opportunities. In this address I will. 12 C. Novak, R. Lingam, J. Coad, A. Emond, Providing more scaffolding: parenting a child pdf disorder, a hidden disability, Child: Care, Health and Development, 2012, 38, 6, 829 Wiley Online Library Background There has been little investigation of the long-term implications of developmental co-ordination disorder (DCD) and, particularly, its impact on families. This is despite the prevalence of the disorder (4.5% to 6%) of the child population, and the high rates of referral to occupational therapy departments. The study reported here was part of an evaluation of an innovative screening clinic for the assessment of children with DCD. 1 Matthias Wagner, Darko Jekauc, Annette Worth, Alexander Woll, Elaboration of the Environmental Stress Hypothesis Results from a Population-Based 6-Year Follow-Up, Frontiers in Psychology, 2016, 7 3 Chantal Camden, Véronique Foley, Dana Anaby, Keiko Shikako-Thomas, Camille Gauthier-Boudreault, Jade Berbari, Cheryl Missiuna, Using an evidence-based online module to improve parents’ ability to support their child with Developmental Coordination Disorder, Disability and Health Journal, 2016, 9, 3, 406 5 Peggy Törn, Erik Pettersson, Paul Lichtenstein, Henrik Anckarsäter, Sebastian Lundström, Clara Hellner Gumpert, Henrik Larsson, Linnea Kollberg, Niklas Långström,
